

Expense Tracker

A handy guide to tracking your spending — every rupee accounted for

Welcome! Expense Tracker helps you record daily spending, scan paper bills with AI, and understand where your money goes. This guide walks you through everything you can do.

1 Getting Started — Your Account

- 1 Open the app link in your phone or computer browser.
- 2 Tap **Create an account**, enter your email and a password (at least 8 characters), then tap **Create Account**. Use the eye icon to double-check what you typed.
- 3 New accounts need a one-time approval from the administrator. If you see “*awaiting admin approval*”, just wait for the nod and sign in again.
- 4 Next time, simply **Sign In** with the same email and password. You stay signed in on your device until you tap the **exit icon** (top right).
- 5 Forgot your password? Tap **Forgot password?** on the sign-in screen — a reset link lands in your email inbox.

PRIVACY

Your expenses are private — each person sees only their own records, even when several people use the same app.

2 Adding an Expense by Hand

The tabs at the top are icons: **+** to add expenses, the **bar chart** for analytics, and the **exit door** to sign out.

- 1 On the **+** tab, pick the **date** (today is pre-filled).
- 2 Type the **amount** in rupees.
- 3 Start typing a **category** — suggestions like Food & Dining, Groceries, Transport, Rent appear as you type. Pick one or write your own.
- 4 Optionally add a short **note** (e.g. the shop name).
- 5 Tap **Add Expense**. It appears instantly in the list below.

TIP

Change the date field to any day to see and add expenses for that day — handy for logging yesterday's spending.

3 Scan a Bill with AI

Skip the typing — let AI read the bill for you.

- 1 Tap **Scan Bill with AI** at the top of the Add Expense form.
- 2 Take a photo of the bill or choose one from your gallery. PDF bills work too (up to 8 MB).
- 3 Wait a moment while it reads the bill.
- 4 The **amount**, **date**, **category** and **shop name** are filled in automatically. The shop / bill owner name goes into the note.
- 5 Check the values, correct anything if needed, then tap **Add Expense**.

TIP Good light and a flat, readable bill give the best results. Only genuine bills and receipts are accepted — other photos and documents are politely refused.

LIMITS Each account gets a monthly scan allowance (10 by default — the admin can raise it), with at most 10 scans per 15 minutes. Manual entry always works.

4 Search, Edit & Delete Expenses

- The list under the form shows expenses for the selected date, with category, note and amount.
- Use the **search box** to find an expense by category or note text, or the **category dropdown** to filter — results then show across all your history, not just one day.
- Tap the **pencil** on any entry to edit it — the form fills in with its details; change what you need and tap **Save Changes** (or **Cancel edit** to back out).
- Tap the **x** on any entry to delete it (only your own entries, of course).
- Each category has its own colour and icon so the list is easy to skim.

DUPLICATE If you try to add an expense with the same date and amount as one you already logged, you will be asked to confirm before it is saved — handy when two family members scan the same bill.

5 Monthly Budgets

Open the **gear icon** in the top nav to reach Settings.

- 1 Set an **Overall Monthly Budget** for your total spending, and/or a budget for any **individual category** (Food & Dining, Groceries, Transport, etc).
- 2 Type an amount and tap **Save**. Budgets repeat every month automatically — no need to reset them.
- 3 Each budget shows a progress bar and how much you have spent so far this month; it changes colour near the limit and once you go over.
- 4 To remove a budget, save it as **0**.

TIP Budgets you set also appear as a “Budget progress” card on the Analytics screen, so you can check them alongside your charts.

6 Analytics — Where Your Money Goes

- **Today / This Week / This Month** cards show your current totals at a glance.
- **Monthly summary** — pick any **month and year** to see your total spend and number of expenses for that period. Choose “All” months for a whole-year view.
- **Daily spending** bar chart highlights today.
- **Monthly overview** shows your spending trend across the last 6 months.
- **Category breakdown** — a colour wheel plus a table with totals, percentages and bars. Switch the period between Today, Week, Month and All.

7 Export to Excel

At the bottom of Analytics, tap **Export to Excel (.xlsx)**. You get a spreadsheet with every expense (date, category, amount, note) plus a ready-made category summary sheet — perfect for sharing or archiving.

8 Quick Help

- **“Awaiting admin approval”** — your account exists; access opens once the admin approves it.
- **“Too many scans”** — you hit the 15-minute scan limit; wait a few minutes or add the expense manually.
- **“You have used all ... scans for this month”** — your monthly allowance is done; ask the admin to increase it, or enter expenses manually until next month.
- **“This image does not look like a bill”** — retake the photo with the bill filling the frame.
- **Forgot your password?** Use the “Forgot password?” link on the sign-in screen and follow the emailed reset link.
- **Signed out unexpectedly?** Sessions refresh automatically; if it happens, just sign in again.
- **Wrong scan values?** Every field stays editable — fix them before tapping Add Expense.
